System Title:
EVSU VEHICLE GATE PASS APPLICATION SYSTEM

Description:

The **EVSU OCC Vehicle Gate Pass Application System** is designed to streamline the process of applying for vehicle gate passes for students and staff at Eastern Visayas State University Ormoc Campus (EVSU OCC). The system allows students and staff to submit required documents, such as OR, CR, and license images, for verification. Administrators review the applications, approve or decline requests, and manage records through an intuitive admin dashboard. The system aims to improve efficiency, reduce manual paperwork, and enhancing the school's image. The system consists of a **RESTful API** as the core backend and one client application. Additionally, This system will also be integrated with the **CONNECT IT** system developed by the group of Iquen Marba, enabling enhanced connectivity and information sharing between the two platforms.

- A **Web Application** for students and staff

This API is **internal** and used exclusively by the system's own

applications. **System Type:**

- **RESTful API System**
- **System that Uses a RESTful API**

Possible Integrations with Other Systems: (if you propose RESTful API

System.) • N/A

Expected API Integrations: (if you propose System that Uses a RESTful

API.) • N/A
